

CLEANHEALTH WASTE

WOMEN'S COOPERATIVE

Transforming Healthcare Waste into Women's Economic Empowerment

Founded by Samura Boona

Medical Laboratory Technologist

WE4A Grant Application 2026 • Kampala, Uganda

THE PROBLEM

Uganda's healthcare facilities generate 20-92 kg of waste daily, with less than 6% compliance with proper segregation practices.

7,000+

Private Clinics

Lacking proper waste management

85%

Non-Hazardous Waste

Mixed with infectious materials

0

Women's Cooperatives

In healthcare waste sector

Environmental: Medical waste contaminates landfills and groundwater

Economic: Valuable recyclables worth millions are buried

OUR SOLUTION

Women's Cooperative Model

Organize women into a professional cooperative providing healthcare waste sorting, non-hazardous collection, and recycling linkage services.

Expert Training from Medical Lab Professional

Waste categories, biohazard identification, safe handling

Non-Hazardous Focus = Low Risk, High Value

Paper, cardboard, plastics—no expensive equipment needed

Compliance Partner for Healthcare Facilities

Help clinics meet NEMA regulations + staff training

HOW IT WORKS

1

Partner with Facilities

Monthly service contracts

2

Train Staff on Segregation

Proper source separation

3

Collect Non-Hazardous Waste

Regular scheduled pickups

4

Sort & Sell Recyclables

Partner with recycling firms

Proven model: Women's waste cooperatives created 5,739 jobs in Ethiopia

WHY NOW?

- ▶ **New NEMA Regulations** mandate proper healthcare waste management
- ▶ **No organized competition** in women-led healthcare waste services
- ▶ **Growing private healthcare** sector needs solutions

Samura Boona

Founder & Lead Trainer

Medical Laboratory Technologist with expertise in hematology and general medical lab science. Deep understanding of biohazards, waste categories, and safety protocols.

WHY I'M UNIQUELY QUALIFIED

Medical Lab Expertise

Trained in identifying infectious materials, proper specimen handling, and biohazard protocols

Hematology Specialization

Expert knowledge of blood-borne pathogens and contamination risks

Healthcare Facility Knowledge

Understands waste streams from labs, wards, and clinical settings

Training Capability

Can train cooperative members and facility staff on proper waste segregation

"My medical laboratory background gives me the credibility to train women on what waste is truly hazardous versus what can be safely recycled."

ROADMAP TO SUCCESS

Q1

LAUNCH

- Register cooperative
- Recruit 8 founding members
- Complete safety training
- Sign 5 pilot facilities

Target: 5 clients

Q2

STABILIZE

- Reach break-even (Month 5)
- Establish recycler partnerships
- Launch training program
- Refine operations

Target: 10 clients

Y2

GROW

- Expand to 15 facilities
- Recruit 4 more members
- NEMA partnership
- 48% profit margin

Target: 15 clients

Y3

SCALE

- 25 facility clients
- 15 women employed
- Expand to 2nd district
- Apply for follow-on funding

\$35,200 revenue

Follow-on Funding: Top performers eligible for €50,000 investment from WE4A Demo Day
